Professional Experience

twoday Oy   Tampere, Finland, Oct 2022 – Apr 2025
IT Services & Consulting Company

- Engineered and deployed Finnish regional healthcare portals (e.g., OmaKeusote, OmaOys, OmaHäme), including UI development and CI/CD maintenance, serving **tens of thousands** of users.

- Led frontend integration of the delegated access (puolesta asiointi) feature in OmaKeusote, enabling users to act on behalf of others via authentication through the Suomi.fi API.

- Developed the frontend of OmaKeusotePro, the admin portal for healthcare professionals, facilitating patient communication, appointment management, and integration with the main OmaKeusote app.

- Contributed to full-stack development of Azure-based cloud services, including Hautahaku and Vainajalogistiikka, for the City of Helsinki.

Tavata Global Oy   Lahti, Finland, Aug 2020 – Nov 2022
Event & networking Company

- Contributed to the development of Tavata's platform, handling both frontend and backend using React.js and Meteor.js enabling live, hybrid, and virtual events for **thousands** of users.

- Designed and implemented a global chat feature with one-on-one and group messaging capabilities, using React.js, Meteor.js, and MongoDB, including complete UI styling and backend logic.

- Developed a Python-based tool for analyzing web applications localization, tracking translated / untranslated terms, and created a Robot Framework test suite to ensure features work properly.
