Professional Experience

Seidat Oy   Helsinki, Finland, Oct 2025 – Dec 2025
Sales and Marketing Company

- Developed an AI-driven content scraper that extracts brand assets from PDFs or websites and automatically generates Seidat presentations, **significantly** improving onboarding and sales workflows.

- Collaborated closely with product and design teams to streamline UI logic, enhance user experience, and introduce modular, reusable component patterns.

- Improved development processes by reviewing code, identifying architectural issues, and contributing to internal best-practice guidelines for the transition to a modern frontend stack.

twoday Oy   Tampere, Finland, Oct 2022 – May 2025
IT Services and Consulting Company

- Engineered Finnish regional healthcare portals (e.g., OmaKeusote, OmaOys, OmaHäme), including UI development, API architecture and CI/CD maintenance, serving **tens of thousands** of users.

- Led frontend integration of the delegated access (puolesta asiointi) feature in OmaKeusote, enabling users to act on behalf of others via authentication through the Suomi.fi API.

- Developed OmaKeusotePro, the admin portal for healthcare professionals, facilitating patient communication, appointment management, and integration with the main OmaKeusote app.

- Collaborated cross-functionally with designers, engineering teams, and public-sector stakeholders to deliver secure, high-availability digital services used by large regional user groups.

- Contributed to full-stack development of Azure-based cloud services, including Hautahaku and Vainajalogistiikka, for the City of Helsinki.

Ovio CarBook Oy   Lahti, Finland, Mar 2022 – Oct 2022
Vehicle Maintenance SaaS Company

- Developed and maintained the company's vehicle-maintenance web application using React and Django, improving usability and supporting new feature development.

- Collaborated closely with product and engineering teams to deliver scalable, production-ready features and improve the overall technical foundation of the platform.

Tavata Global Oy   Lahti, Finland, Aug 2020 – Oct 2022
Event and Networking Company

- Contributed to the development of Tavata's platform, handling both frontend and backend using React.js and Meteor.js enabling live, hybrid, and virtual events for **thousands** of users.

- Designed and implemented a global chat feature with one-on-one and group messaging capabilities, using React.js, Meteor.js, and MongoDB, including complete UI styling and backend logic.

- Developed a Python-based tool for analyzing web applications localization, tracking translated / untranslated terms and created a Robot Framework test suite to ensure features work properly.

Skills

- **Languages**: JavaScript, TypeScript, Python, CSS, HTML, C#, SQL, Visual Basic

- **Technologies**: React.js, Next.js, MongoDB, Node.js, React Query, Redux, MUI, Sass, MUI, Git, Express.js
